

Shield

Endpoint, Firewall & Email Security. Powered by Sophos

Comprehensive Endpoint Security

Shield covers potential threats under one platform to ensure all elements are not only visible through one portal view, but are also sharing data in real time..

Why businesses love Shield security

Unmatched Security Awareness

Sophos' Management Portal gives depth & breadth to centralized network visibility.

Ease of Scalability

Firewall & endpoint protection options customized to be as focused or broad as the business needs require.

Project Management

A dedicated project manager schedules skilled technicians to install the solution.

Simple Security Management

A cloud hosted console allows for server management alongside endpoint, firewall, encryption, mobile, email & WiFi assets.

Lingo Shield Protection 7/24/365 with:

- + **Sophos Firewall**
All the features you would expect from a UTM and more.
- + **Sophos Xstream**
includes a high performance multi-core CPU for SSL inspection and deep packet inspection..

- + **Sophos Security Heartbeat**
Connects Next-Gen endpoints with the firewall to share health status.
- + **Synchronized App Control**
Automatically identifies, classifies, and controls network threats that are currently going unidentified.
