

Integrated Voice & Fax

Upgrade your phone system without having to replace it.

Upgrade Your Existing Phone System

- Add advanced VoIP features and central management
- Real-time failover
- All of the benefits of a modern phone system without the upfront costs

Why businesses love Integrated Voice & Fax

Significant Savings

You don't have to replace your phone system to modernize it for improved productivity, call handling and management.

Scalability

Add additional seats on the fly with no need for wiring or equipment adjustments. Manage and add features remotely.

Voice Clarity & Improved Call Handling

Voice packets are prioritized over data, allowing the highest voice quality available. Advanced call handling features ensures callers get to the right person. Disaster recovery to keep your business connected.

Worry-Free Conversion

Lingo has been converting traditional phone lines from analog to VoIP for more than a decade. Our process focuses on the entire customer experience, eliminating business disruptions and downtime.

How does it work?

Lingo does all the work.

With over a decade of experience with single and multi-location businesses, Lingo will conduct VoIP readiness testing, diagnose and repair issues before installation, deploy expert technicians to deploy your phone system with 24/7 monitoring and support.
